The OSLO OCEAN FREE collection has been produced with NYLON from recovered and recycled plastic. This material, which constitutes a significant portion of the plastic waste in the ocean, is collected, cleaned, and recycled through advanced processes to transform it into reusable raw materials.

In addition, its manufacture reduces the carbon footprint and reduces the impact on the environment compared to other materials.

The depth of the scoop has been increased, allowing it to hold more liquid or food and thus providing greater comfort to the user as the food remains more stable inside the spoon, without spilling.

CURVATURA DEL CUELLO / NECK CURVATURE

Diseñada para mejorar la ergonomía. Facilita el movimiento natural de la mano al llevar la comida a la boca, haciendo que el gesto sea más cómodo y fluido.

Designed to improve ergonomics. Facilitates the natural movement of the hand when bringing food to the mouth, making the gesture more comfortable and fluid.

CURVATURA DEL TALÓN / HEEL CURVATURE

Diseño moderno con alma de tradición japonesa.

Modern design with Japanese tradition.

Inspirado en los cuchillos japoneses Kiritsuke, Kaji es una pieza de diseño único. Su hoja con acabado damasco revela el saber hacer artesanal con líneas ligeramente curvadas para un corte preciso. El mango, de madera maciza con un toque de color, reinterpreta los mangos octagonales tradicionales para la mesa moderna, ofreciendo ergonomía y equilibrio perfectos.

Le acompaña un tenedor con dos puntas y mango simétrico, completando un conjunto icónico y exclusivo. El Nombre Kaji significa "forge" o "fuego" en japonés, refleja el proceso meticuloso de creación de esta pieza única.

Inspired by the Japanese Kiritsuke knives, Kaji is a unique piece of design. Its damask-finished blade reveals the craftsman's know-how with slightly curved lines for a precise cut. The handle, solid wood with a touch of colour, reinterprets traditional octagonal handles for the modern table, offering perfect ergonomics and balance.

It is accompanied by a fork with two prongs and a symmetrical handle, completing an iconic and exclusive set. The name Kaji means 'forge' or 'fire' in Japanese, reflecting the meticulous process of creating this unique piece.

Uno de los proyectos troncales que se desarrollaron en la 18a edición del Master en Diseño y Desarrollo de Producto, fue el proyecto que Comas propuso a los alumnos del Master. El reto consistió en diseñar y desarrollar un cuchillo icónico que pudiera complementar algunas de las colecciones actuales de nuestro catálogo.

Los 26 alumnos del Master, repartidos en 5 grupos, en la 1a fase conceptual presentaron 26 propuestas de diseño de nuevos cuchillos, de los cuales desarrollaron 12 propuestas con todo detalle y llegaron a un prototipo volumétrico de calidad, siguiendo las indicaciones de la empresa.

Madera estabilizada

Stabilised wood

Material fabricado mediante la inyección de resinas termoestables y color en la madera. Con esta inyección de resina se obtiene un sellado de mayor dureza, impermeabilidad y resistencia.

Además, con el color podemos personalizar la madera y crear diferentes patrones y variedad de gamas dándole un toque de sofisticación y originalidad al cuchillo.

Material manufactured by injecting thermosetting resins and color into the wood. With this injection, a seal of greater hardness, impermeability and resistance is obtained.

In addition, with colour we can personalise the wood and create different patterns and a variety of ranges, giving a touch of sophistication and originality to the knife.

Acero de carbono

El 52100 es un acero al cromo con alto contenido en carbono que ha ganado popularidad en el mundo de la cuchillería para hojas de alto rendimiento.

Conocido por su excepcional dureza, resistencia al desgaste y retención del filo, se utiliza a menudo en cuchillos personalizados de gama alta que requieren una durabilidad superior.

Al ser un cuchillo no inoxidable, se le ha aplicado una pátina negra en toda la hoja para evitar que se oxide fácilmente. Aún así aconsejamos lavarlo siempre a mano y secarlo rápido.

Si se guarda durante tiempo es aconsejable untar de aceite mineral la hoja y la espiga así como guardarlo protegido con funda o sayo.

Carbon steel

52100 is a high-carbon chrome steel that has gained popularity in the world of high-performance knife making.

Known for its exceptional hardness, wear resistance and edge retention, it is often used in high-end custom knives that require superior durability.

As a non-stainless knife, a black patina has been applied to the entire blade to prevent it from rusting easily. Even so, we advise to always wash it by hand and dry it quickly.

If it is stored for a long time, it is advisable to smear mineral oil on the blade and tang and to keep it protected with a saya.

**Raíz de abedul estabilizada**

El mango, de raíz de abedul estabilizada proporciona a la colección la elegancia de una madera noble.

El proceso de estabilización protege y sella la porosidad de la madera para garantizar una mayor durabilidad y resistencia, además de resultar muy agradable al tacto.

Aún siendo un material duradero y resistente es importante evitar el lavavajillas y mantener siempre el cuchillo seco.

Stabilised birch root

The handle, made of stabilised birch root, gives the collection the elegance of a noble wood.

The stabilisation process protects and seals the porosity of the wood to ensure greater durability and strength, as well as being very pleasant to the touch.

Yet being a durable and resistant material, it is important to avoid dishwashing and to always keep the knife dry.

El término "finger food" se refiere a alimentos que se pueden consumir con las manos, sin la necesidad de cubiertos. Estos platillos suelen ser pequeños, fáciles de comer y están diseñados para ser saboreados en una o dos mordidas.

Siguiendo este concepto, Comas ha creado una colección de cubiertos de tamaño reducido, como una prolongación de nuestros dedos, que permiten disfrutar de estos platillos de manera práctica y original, ideales para caterings y eventos.

The term "finger food" refers to food that can be eaten with the hands, without the need for cutlery. These dishes are usually small, easy to eat and designed to be savoured in one or two bites.
